Abstract

PURPOSE:To make it possible to scrupulously perform a control of an input/ output device by enabling the changes of the functions of the input/output device without changing an application program itself. CONSTITUTION:A data conversion part 6 is provided between a processor 5 and an input/output control device 4. This data conversion part 6 converts the data having a designated format of the data from the input/output control device 4 into another data block and lets the data having no designated format pass as it is.
